

HEAT UP & EAT UP!

GENERAL HEATING GUIDELINES

Keep foods cold until reheating time. Serve immediately when hot.

Preheat oven to 350°. Bring food to room temperature by leaving on counter for approximately 30 minutes. Remove all plastic lids. Cover product with foil, if desired. Place small foil pans on a baking sheet and place in preheated oven. Heating times may vary, depending on oven calibration and the number of items in the oven.

All reheated foods must reach an internal temperature of at least **165°** for **15** seconds within a two-hour window. For the microwave, foods must reach an internal temperature of 190°.

Use a properly calibrated thermometer to monitor the temperature. Check items periodically while reheating. Fully cooked items should be reheated only once. Feel free to call our catering department for further assistance.
